## Air Quality

Hello All HPUL Tribal Members and Staff,

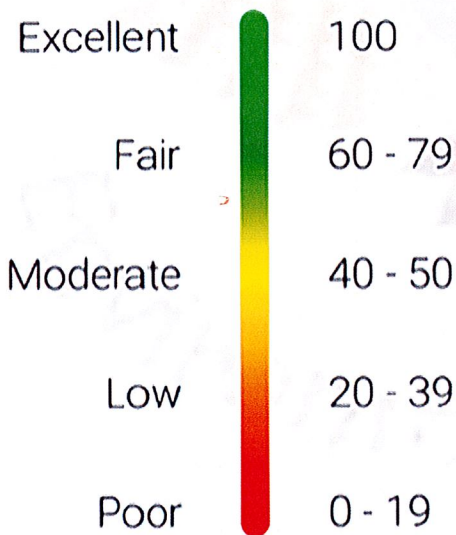

Due to the Wild Fires in our area and surrounding areas Air Quality deminished. HPUL EPA Department is advising you to be cautious of the Air Quality. As of October 10, 2017 12:16 pm the Air Quality is at 27, low Air Quality.

HPUL EPA has started our Flag program. As you drive by the Tribal Office there is a flag that will match the Breezo Meter Index.

HPUL will put a Purple Flag out on days when the Air Quality is a zero.

**BreezoMeter** is a free app you can download on any android phone. This App will give you real time Air Quality Information. It also tells you what you should do in that particular Air Quality. Great App to have especially for the parents and elderly.

### The BAQI Scale:

### Low air quality

What you should do:

Keep calm and stay indoors. Do it for the kids...

There is a strong chance for respiratory distress for those with respiratory sensitivities

With this air quality level, you should check the area for cleaner places to engage in outdoor activity

It is a good idea to stay in closed & air conditioned places

Unless you really have to, our recommendation is to minimize your time outdoors

If you have any questions or concerns contact Linda D. Rosas–Bill Environmental Director at (707)2750737 or E-Mail: lrosas@hpultribe-nsn.gov

Thank You,

HPUL EPA Department
